

### **Claim Amendment**

Claim 1 (original) A hygiene cap detachably provided for a can having a lid formed with an outlet and an opener for opening the outlet, the hygiene cap comprising:  
     a cap body interposed between an outer surface of the lid and the opener and rotating about the lid; and  
     a cleaner attached under the cap body and cleaning the outer surface of the lid as the cap body rotates.

Claim 2 (original) The hygiene cap according to claim 1, wherein the cap body comprises:  
     a contact plate covering the lid and being thinner than a space between the opener and the lid; and  
     an opener through portion formed in a predetermined region of the contact plate.

Claim 3 (original) The hygiene cap according to claim 1, wherein the cap body comprises:  
     a contact plate covering the lid and being thinner than a space between the opener and the lid;  
     a contact maintaining portion formed in a circumferential region of the contact plate and fitted to a circumferential rim of the lid; and  
     an opener through portion formed in a predetermined region of the contact plate.

Claim 4 (original) The hygiene cap according to claim 3, wherein the contact maintaining portion is at least partially formed with a grip pattern along a circumferential direction thereof.

Claim 5 (original) The hygiene cap according to claim 3, further comprising an extended part extended downward from the contact maintaining portion and surrounding an outer circumference of the can,  
     wherein the cleaner is extended to an inner side of the extended part .

Claim 6 (currently amended) The hygiene cap according to claim 2 ~~or 3~~, wherein the contact plate is formed with at least one rotation grip rib.

Claim 7 (currently amended) The hygiene cap according to claim ~~anyone of 1 through 4~~, wherein the cap body is formed with at least one cap-removing tip projected from a predetermined region thereof.

Claim 8 (currently amended) The hygiene cap according to claim 2 ~~or 3~~, wherein the opener through portion is formed by penetrating a surface of the contact portion or partially cutting away the cap body to have a shape corresponding to the opener.

Claim 9 (currently amended) The hygiene cap according to claim ~~anyone of 1 through 5~~, wherein the cap body includes one of synthetic resin, a metal plate, and paper.

Claim 10 (currently amended) The hygiene cap according to claim ~~anyone of 1 through 5~~, wherein the cap body includes an advertisement design on at least one region thereof.

Claim 11 (currently amended) The hygiene cap according to claim ~~anyone of 1 through 3~~, wherein the cleaner includes one of a fabric material or paper.

Claim 12 (currently amended) The hygiene cap according to claim ~~anyone of 1 through 11~~, wherein the cleaner contains at least one of an antibacterial agent, a deodorizer and an aromatic agent.
